

WSUD MAINTENANCE COMPLIANCE FRAMEWORK

Your guide to WSUD maintenance compliance

About the Framework

A free package of information, resources and tools to help councils improve their implementation and management of Water Sensitive Urban Design (WSUD) assets within their jurisdiction so that this infrastructure can protect the environment and benefit communities. The development of the Framework has been led by Ocean Protect but has involved hundreds of stakeholders within the stormwater industry.

What does it include?

Guideline

Introduces the topic & the relevant law, outlines how to operate a WSUD maintenance compliance program, and provides a range of other information & resources.

Process Maps

Demonstrates the different processes & pathways within the proposed WSUD maintenance compliance program.

Mockup information management system

Demonstrates how the data & information within such a program could be managed.

Benefits

Save time, money, & capacity

Meet legal obligations

Improve maintenance & compliance

Protect community & environment

More efficient infrastructure
